

EXPERIMENT-18 DB with Name and DOB

Aim

To create a **Prolog database containing names and dates of birth** and retrieve the required information.

Objectives

- To understand facts in Prolog.
- To create a simple database.
- To retrieve information using queries.

Algorithm

1. Define name and DOB as facts.
2. Use the dob/2 predicate.
3. Enter a query for a particular person.
4. Prolog searches the database.
5. Display the matching DOB.

Flowchart

Result

The Prolog database successfully stores and retrieves **Name-DOB** information.

Conclusion

Thus, a simple database using Prolog facts was successfully created and queried.
